EDUCATION

Sogang University

B.S. in Computer Science & Art & Technology

Expected Aug 2027

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript, HTML/CSS

AI / Data: PyTorch, FAISS, Sentence Transformers, pandas, NumPy

Tools / Platforms: Git, GitHub, Excel, p5.js, Max 7, Maya

PROJECTS

Trajectory - JavaScript, HTML/CSS, Local Storage

[\[GitHub\]](#) [\[Live Demo\]](#)

- Built a browser-based career activity tracking system that records user activity as raw facts and derives progression state at runtime using deterministic rules.
- Implemented activity creation, editing, recalculation, persistence, ruleset versioning, and migration logic to keep stored data compatible as the system evolves.
- Designed regression tests around XP calculation, activity editing, level progression, and data restoration to prevent state corruption across updates.

RAG Question Answering System— Python, Sentence Transformers, FAISS

[To Be Updated]

- Built a retrieval-augmented QA pipeline using Sentence Transformers for semantic embeddings and FAISS for nearest-neighbor retrieval over SQuAD v2 passages.
- Evaluated retrieval quality using Recall@K, achieving approximately 0.56 Recall@1, 0.864 Recall@5, and 0.934 Recall@10.

Concurrent Stock Server — C, Systems Programming

[To Be Updated]

- Built a networked stock server in C that processes client requests and maintains shared stock data.
- Implemented server-side request handling and data persistence while managing concurrent access to shared resources.
- Applied systems programming concepts including sockets, processes/threads, synchronization, and file I/O.

EXPERIENCE

The Pure Lab Corporation – Seoul, South Korea

Feb 2023 - Present

Global Marketing & English Localization Specialist

- Prepared, cleaned, and validated operational and financial datasets for internal reporting using advanced Excel formulas and workflow automation.
- Identified scaling bottlenecks in spreadsheet-based processes and explored software-based approaches to reduce repetitive manual work.

Play Language – Seoul, South Korea

Mar 2023 - Sep 2023

Minecraft Education Content Developer & English Translator

- Designed and built interactive Minecraft Education worlds and in-game learning experiences in collaboration with educators.
- Tested and refined educational content against learning objectives and student-engagement requirements.

LEADERSHIP & AWARDS

President, SHOCK Street Dance Club — Sogang University

2025 - 2026

- Led a 300+ member student organization and managed executive operations, budgeting, recruitment, performances, and long-term planning.
- Organized and sold out a 787-seat external concert venue (Yongsan Art Hall), overseeing ticketing, logistics, and event operations.

Kakao Impact — Art, Technology and Social Impact Project

2026

- Won the Social Value Award (사회가치상) for a climate-tech/social-impact project developed through the Kakao Impact program.
- Created the project mascot, later selected as the official ambassador for the 2026 Climate Tech Startup Summit, extending the project beyond the original program.
- Received a Popularity Award based on audience response and engagement.
